

Serial No. 09/671,115  
Amdt. dated September 16, 2003  
Reply to Office Action of May 16, 2003

Docket No. P-129

**IN THE SPECIFICATION**

✓ Please amend the specification as follows starting at page 8, line 19, and ending at page 9, line 1:

Ad/ With reference to Figure 5, when a new ESPM is received, the MSM stores the MCCs in the second register (S30~S32). At the same time, the MSM searches an MCCm identical to the MCCs from the mapping table and stores its emergency call number corresponding to the searched MCCm in a phone book (S33). And then, the MSM links a read address of the phone book storing the emergency call number to the emergency call key or to '9 key' (S34). That is, in case of using the '9 key' as a one-touch dial, the emergency call number is stored in the address [['0']] '2' of the phone book.
